Stonebridge Bank Increases Online Security

West Chester, PA – June 3, 2005 –West Chester, PA-based Stonebridge Bank is among the first financial institutions to increase online security for their customers through Two-factor authentication.

Two-factor authentication is an additional layer of security that provides a second verification of your online identity. Stonebridge Bank offers two forms of Two-factor authentication, the RSA SecurID™ Token and Stonebridge Shared Secret. The RSA SecurID™ token uses a token with a digital readout you must enter upon login. The Shared Secret is a randomly generated question that you will have to answer before login is complete.

According to Fred Schea, Stonebridge Bank's Chief Financial Officer, "Stonebridge Bank strives to provide our customers with the latest in online security. Two-factor authentication allows customers to do their banking online with a sense of security only found with this method of additional online protection."

About Stonebridge Bank

Stonebridge Bank is positioned as the Delaware Valley's Local Internet Bank™, combining community banking with advanced online technology. Based in West Chester, PA, Stonebridge Bank serves commercial banking customers through locations in PA, DE, MD and NJ while offering customers around the nation a complete range of retail banking services through www.stonebridgebank.com.
